Class upload 0.25The [version 0.25](#) is out, with a lot more features, improvements and bug fixes; check out some [samples](#), the [changelog](#), the [documentation](#) and [download it!](#)

New website!After several years of service, the site layout was getting a bit old. So I implemented a new and clearer template, and just put it online. There will be more to come soon.

class.upload forum! I have added a [forum](#) on the site where you can share information about the [class](#)

OzForces meter! I released [a little bash script](#) to retrieve ADSL usage data for the australian ISP OzForces.

Class upload 0.20The [version 0.20](#) is out, with a lot more features. A wide range of image manipulation has been implemented; check out some [samples](#), the [Changelog](#), the [documentation](#) and [download it!](#)

Class upload samplesYou can find [here](#) some samples of the image manipulation capabilities of the version 0.19

The CMF! I added an [introduction page for the CMF](#). Not a lot yet, but more will be published soon.

Class upload 0.18New release of [class.upload.php](#) version 0.18 with some new features. Full GD 1&2 compatibility and additional security checks on upload. [version 0.19](#) coming soon, stay tuned...

CD coversCheck out these new [CD covers](#) I did for the band *vacuum cleaner*

Zen Garden theme! I did a new theme for the [CSS Zen Garden](#). Check it out [here](#). It still has a few problems, but works neatly. It's called Zen Girl.
